* Item may not be available in all states.

Deodorizing Blocks Defined:

PARA BLOCK DEODORANTS

Air-activated, freshen the air and eliminate undesirable odors. Made from paradichlorobenzene saturated with liquid deodorants. WARNING: This product contains a chemical known to the state of California to cause cancer and may not be available in all states.

NON-PARA BLOCK DEODORANTS

Water-activated, tint the water blue, counteract odors and fight bacterial growth. Contains no paradichlorobenzene.

ENZYMATIC BLOCK DEODORANTS

Beneficial bacteria are added to the deodorizing (Para or Non-Para) block. The bacteria release enzymes that consume the odor's source, effectively and permanently eliminating odors.
