RCP 9C96-01	Cedar Forest	
RCP 9C97-01	Cinnamon Spice	

Going green is more than a trend. It is the new way that corporations are thinking about their energy usage and how to save money. Such as installing solar power systems and implementing measures to reduce energy and water consumption. It isn't just environmental ethics driving the movement. Green choices—like saving water and electricity—make good economic sense. Your company can benefit also, by finding ways to reduce energy consumption and take advantage of the cost savings. Since savings accumulate over time, the sooner you begin to implement a green program, the greater the benefits will be.
